

At Verizon, we're committed to empowering the best and brightest to lead our groundbreaking work. With the latest technology and innovations at your fingertips, you'll have the power to do more than ever before. We're looking for driven, talented candidates to fill these great roles:

## **Enterprise/B2B**

### **Business to Business Sales**

- Results-driven sales pros that businesses count on to connect, share and engage with customers faster.
- Trusted advisers providing personalized solutions to help businesses adapt, transform and collaborate with customers.
- Top reps growing new business and existing accounts by interpreting data and trends and maintaining continuity.

### **Enterprise sales**

- Client partners who develop custom solutions and sell strategic services to enterprise customers.
- Global, C-suite relationship builders.
- Sales experts, well-versed in network technologies, cloud, security, video delivery capabilities and more.

### **Inside sales**

- Strong listeners who create personalized solutions for customers over the phone.
- Sales pros who enjoy teaming with others in a call center environment.
- Go getters, deal makers and overachievers.

## **Technology**

### **Information technology**

- Techies who can transform the way we work on the inside to improve the experience we deliver on the outside.
- Developers, cloud architects, data scientists, quality assurance pros, solutions architects, system integrators and more.
- Collaborative team players and innovators who love working with the latest technology.

### **Software engineering**

- Designers, coders and testers with "start up" energy and drive.
- Software experts who define, build and deploy disruptive technology.
- Innovators who create new products and services for customers

### **Network engineering**

- Innovators designing and supporting the nation's largest, most reliable 4G LTE network and the future of 5G today.
- Curious engineers ready to build, test and deploy the network that powers safer communities and smarter futures.
- Architects who can design next-gen networks today.

### **Field operations**

- Customer-focused team players proud to support our award winning networks.
- Critical thinkers and troubleshooters who love tackling new challenges every day.
- Network installers, testers and repair pros.

## **Corporate**

### **Finance**

- Data lovers with a head for numbers, an eye for detail and a passion for analysis.
- Leaders who strategically manage Verizon's assets and drive shareholder value.
- Experienced and entry-level finance professionals in accounting, financial planning, billing, payroll, auditing and more.

### **Marketing**

- Natural storytellers and creative minds who can keep Verizon's iconic brand at the top of its game.
- Brand ambassadors who create and mold epic marketing strategies.
- Marketing pros in insights, creative, digital, customer experience, corporate responsibility, public relations, product marketing and more.

### **Human resources**

- Culture champions who understand that people are our most important asset.
- HR pros who attract, hire and inspire brilliance.
- Business leaders who unleash the power of individuals to thrive.

### **Sourcing and supply chain**

- Leaders who oversee strategic and global supplier relationships for all areas of the business.
- Experts in warehouse management, transportation, company-wide sustainability efforts and more.
- Professionals with a passion for streamlining processes, improving cycle management, reducing costs and optimizing working capital.
