

# We are Medline

## Join our team and accelerate your career in healthcare

We empower people to share their best ideas. We create new opportunities for our customers and ourselves. And we work together to solve today's toughest healthcare challenges.

## Be part of something bigger

- We're 28,000 people strong, working in over 125 countries
- We're a global healthcare company with Chicago/Midwestern roots that have stayed with us—we solve problems quickly, put customers and employees first and challenge the status quo to find new ways to grow our business and each other

## Make a difference

We bring our people, experience and resources to the people that need them most. We're working together to make our local and global communities stronger while creating solutions to protect the environment. Our goal is to bring everything that we've learned from partnering with the world's top health systems to the people and places that need it most.

## What we stand for

Every day we're focused on building a more diverse and inclusive company, one that recognizes, values and respects the differences we all bring to the workplace. We encourage you to get involved in our Employee Resource Groups (ERGs,) and your community. There are 7 total ERGs as of today, but we're not stopping there, visit our website to learn more.

## Our Values

**“When everyone feels comfortable to be themselves, innovation thrives.”**  
**–Andy Mills, Medline President**
